

# New: Meltable/Brushable Clays from **Chavant**

## **MONU-MELT™ (Meltable Clayette)**

**MONU-MELT™** brings all of the qualities of Clayette – a sulfur-free, non-hardening, tack-free, odor-free, and flexible clay – into a formula that can be melted and applied to a CNC foam armature by brush. By popular demand this material has been introduced in a Dark Forest Green color.

**MONU-MELT™** will not oxidize and can be left out or heated and cooled repeatedly without any significant change. Will not dry or crack.

**MONU-MELT™** is available in Soft, Medium and Hard: 2, 4 & 6 respectively on a scale of 1 – 10 (see Clayette in Product Guide).

**MONU-MELT™** should be melted in a range from 180-200°F. Keeping the clay above 200°F will result in bubbling of the liquid clay. This bubbling is mostly aesthetic, and will not affect the characteristics of the cool clay.
